

A tragic accident ends Laura Nelsons career as a surgeon. After accepting a position as Vice President for Research at a large pharmaceutical company, Laura works to finalize the imminent approval of the companys groundbreaking new drug. But Jake Harter, a malicious Food and Drug Administration employee, cannot let that happen. He is obsessed with Adawia Abdul, the beautiful Iraqi scientist who discovered the drug. As soon as the drug is approved, Adawia will collect a substantial bonus and reluctantly return home to replace her dying father, the lead scientist in Saddam Husseins bioweapon program. As Husseins henchmen apply brutal pressure to assure Dr. Abduls speedy return to Iraq, Harter uses his influence to stall the drugs approval. If Laura gets in his way, he will eliminate her as he has her predecessor and his own wife.
