

The Acts of the Apostles In Cherokee (Cherokee Bible Project) (Volume 7)

The Acts of the Apostles describes the first decade of the nascent Christian community, and reads like a spiritual adventure story. This is a companion to the Cherokee syllabary-only New Testament digitized and released in 2013. Translated into Cherokee in the nineteenth century under the direction of Revs. Samuel Worcester and Elias Boudinot, the Cherokee New Testament is the largest complex text composed in Cherokee by fluent speakers with command of a high level of the language. For generations, the New Testament has been used by Cherokees of all persuasions to learn to speak and write as their ancestors did. While the four gospels speak of the life of Jesus, Acts documents the founding of His Church, as his followers stand up to the mission they have been given is considered the most poetic and literary of the four Gospels, Tradition claims the author was Luke, the Apostle Paul's personal physician, who accompanied him on this travels. The Cherokee translators strove to use a level of the Cherokee language that did justice to the Greek, as they translated from the Textus Receptus rather than the English King James Version or the Latin Vulgate. Deepen your understanding of the Cherokee Bible and the Cherokee language by reading each verse in Cherokee syllabary, phonetic Cherokee, and English.
