

Make a Man Fall in Love With You: Fun Tips to Get the Guy and Keep Him (Dating & Relationship Advice)

For some people just finding someone they can tolerate is difficult enough while others cant walk to the local post office without falling in love twice on the way. This is the book for both cases and everyone in between going from how to determine what you are really looking for and where to best find that perfect fellow and then going on to the casual courtship and culminating in the actual moment of love. Dont expect a rigid set of rules or a boring step by step, how it is done book though. Love does not follow any silly rules nor will it be confined to a step by step process. You have to find the smallest seed of love and then protect it from ill-winds, upsets and nurture it until it blossoms forth. Even those who cast a wary eye on love in all of its glory may find some charm here- and may agree to shake off their negative thoughts and give love or at least loves little sister, like a chance once again. This should be a fun book to read because it is about one of the oldest and dearest of the human experiences ever. Even if you have had your heart broken a dozen times you have to admit that it was quite a ride to get there, no? Here is a preview of what you will learn from this book: The difference between dating and dating that matters. The difference between a first date and a first connection. How to decide if the connection is enough to pursue or whether you should just let it wither on the vine. How to keep him interested in finding out more about you without giving up all of your information right away even if you really, really like him. How to know when it is time to let him know how you feel and just how to let the cat out of the bag. Come on a journey of love with me. Take my hand. I promise we will have fun and even if the next heart to hit the floor and shatter is one of our own I promise that it will mend, and we shall love once again.
