

## Screw Student Loans

Are you a student who is worried about repaying student loans and all the debt that you have on you? Or are you a student who is thinking of taking up a student loan, but doubts how the same will be repaid? Student loans are perhaps the most-used ways used by students who cannot afford the expensive higher education expenses and overheads for most good universities. However, these loans usually leave the student in trouble if he or she doesn't get a job early after the completion of education.

This book attempts to help you or anyone who is facing repayment of student loans and doesn't know what to do. Before anything, don't panic, take a deep breath and understand that there are several options that you have available. You may ask for a change in the terms of the loan, consolidate loans and ask for a refinance, in addition to several others. In addition, you may also work towards generating income and saving all that you can to make repayment easier. This book gives you hand-on tips on what you need to do, how you must implement them and how they will help you become debt-free.
