

Sons of the Conquerors: The Rise of the Turkic World

In his major new work, Wall Street Journal Istanbul correspondent Hugh Pope provides a vivid picture of the Turkic people, descendants of the nomadic armies that conquered the Byzantine Empire and reigned over the region for centuries. Today the Turks encompass a region much larger than the political boundaries of the nation of Turkey - from the Xinjiang province of western China, to Iran, Iraq, the Netherlands, Germany, all the way to the Appalachian Mountains of the United States. One of the world's foremost experts on modern Turkey - its languages, people, and history - and acclaimed co-author of *Turkey Unveiled* (a New York Times Notable Book), Hugh Pope has traveled the world to encounter and assimilate the many facets of this extraordinarily complex and fascinating ethnic group, distilling the essential qualities shared by all people of Turkish descent. Rich with stories and legends stretching back centuries, *Sons of the Conquerors* is a compellingly readable account of a profoundly neglected subject.
