

## Text Psyche Mining: Normative Vision

Since the beginning of the written word, the reader has always tried to grasp the writers mind. With the advent of computational intelligence, hidden meanings were deciphered from the text. Subjective criticism once known not to the naive, could only now be objectively understood via learning machines. This is the beginning of machine assisted knowledge, wisdom and vision acquired through belief norms. In this book, the Word of God models the norms of society mining the prophetic psyche. The third edition introduces Normative Vision of Pathos, Ethos and Logos in the Bible. The first ever Visual Analytics of Pathos in Genesis, Exodus and Gospel gives insight to the blind reading of context. We give tribute to the spirit of divine philosophy intrigued by The Prophets, immortalized by Socrates, documented by Plato, analyzed apriori by Aristotle, and employed by experts of religion, sociology, economics, and politics. Discovering Pathos in the Bible, we experience the Divine Passion in the hearts and minds of men, for, Who has known the mind of the LORD so as to instruct Him? But we have the mind of Christ. (St. Paul Letter to Corinthians)
